Professional Summary

Lead Data Scientist & ML Researcher with 6+ years of experience developing predictive statistical models, large language model pipelines, and quantitative customer analytics. Specialized in PyTorch and BigQuery.

Technical Skills

Languages: Python, R, SQL, Bash
Data & ML: Machine Learning, Deep Learning, PyTorch, Scikit-Learn, Pandas, NumPy, Statistics
NLP & GenAI: NLP, LLMs, Hugging Face, Transformers, spaCy, Vector Databases
Big Data & Viz: BigQuery, Apache Spark, Snowflake, Tableau, Matplotlib, Seaborn
DevOps & Tools: Docker, Git, Linux, Jupyter, MLflow

Professional Experience

Senior Data Scientist - QuantMetrics Analytics | 2020 - Present
- Spearheaded end-to-end churn prediction model in Python using XGBoost, improving customer retention by 22%.
- Engineered deep learning NLP pipeline with PyTorch and Transformers to classify 500,000+ support tickets.
- Built enterprise executive Tableau dashboards connected to Snowflake data warehouse.

Data Scientist - DataCore Solutions | 2018 - 2020
- Conducted A/B testing statistical analyses across 1.2M user experiments.
- Automated ETL pipelines using PySpark and SQL, cutting data ingestion latency by 40%.

Education

Ph.D. in Computational Statistics - Columbia University (2014 - 2018)
B.S. in Mathematics - MIT (2010 - 2014)
